

Quarry tile
for real life

2025

 **ALFAGRES**

Our organization

Alfagres sustainable vision

In our efforts to define a clear path towards sustainability, we have a commitment that goes beyond the generation of economic value. We are devoted to making each person's Real Life much better, creating environments in which we look after that Real life, thus contributing to the construction of sustainable cities and communities.

With focus on contributing to a better future, we promote change through three strategic axes:

Value creation for real life

We innovate and develop sustainable products and solutions for spaces that transform people's lives.

Real life for the planet

We adapt our processes to make efficient use of natural resources, proactively contributing to global challenges.

Real life for people

At Alfagres, we are committed to making everyone's real life better, both for our people and for our communities.

**We care
for real life**

We care for real life

We continue with our commitment to sustainability, which has always been integrated into our essence and for which we constantly work on our products and processes. We have made progress in this task, innovating with a new formula for ceramic production with which we reduce around

We avoid the
4%
emissions

of

Equivalent to planting

131.586

Trees

We also saved more than 38.000 cubic meters of water and 6 million cubic meters of gas in our production*, and implemented the use of packaging made from 100% recycled materials. This way, we can confidently say,

"We care for Real Life."

*Due to our dry milling process. Reduction calculated compared with a wet milling process.

Quarry tile

The experience come true

The product that best captures how tradition adapts to modern times without losing its essence. Reinventing itself with a combination of traditional techniques and materials, and adding technological tools that provide design and style, resulting in unique, sophisticated, and functional products like our Porcelagres.

As always, and totally different...

Ceramic tiles

Endless design possibilities

Our ceramics reflect the connection between tradition and modernity, offering styles, designs, and textures that bring beauty, calm, spaciousness, and functionality to any space. They are made using advanced technologies such as micro-groove technology, which recreates natural wear and detail to add texture and depth; hyperrealism, which enhances every color, shadow, and detail through the highest-resolution digital printing available on the market; and ultra-gloss technology, which uses a special glaze to achieve intense shine, a greater sense of space, and superior resistance. Additionally, our production process contributes to a more sustainable world through dry milling and low water and energy consumption.

Decorations and meshes

design can change everything

In those spaces of our home that are objects of attention, our decorations and meshes become the protagonists of beauty and enchantment. With unique shapes and vibrant colors, these facades transform our spaces into dream settings. Easy to combine and install, these surfaces are portals to beauty and creativity, filling our spaces and real life with charm and balance.
